

KOKC Model Tracker

Live weather model forecast tracker for KOKC (Oklahoma City) using wethr.net API.

Deploy to Render

1. Push this repo to GitHub
2. Go to render.com → New → Web Service → connect your GitHub repo
3. Render auto-detects `render.yaml` — just add your `WETHR_API_KEY` environment variable
4. Deploy. Done.

Usage

- Open your Render URL each morning
- Click **Morning Entry** tab and fill in accuracy data from wethr.net/accuracy
- Dashboard auto-refreshes every 5 minutes
